Same capacity. Different fit.

Owala 24 oz stainless-steel FreeSip vs FreeSip Twist

Print at Actual size / 100%. Turn off Fit to page. Check the line below first.

This line must measure 50 mm (5 cm).

How to use these circles

Cut along the outer edge. These represent published diameters, not exact outlines.

Compare with the narrowest clear width at the depth where the base will sit.

Allow extra space for clips, sleeves and tolerances. Do not force a fit.

A paper circle cannot test depth, grip, stability, lifting or opening the cap.

Check height separately: FreeSip 271.27 mm; Twist 299.72 mm.

Source and scope

Owala specifications checked 15 September 2026. Inch values converted to mm.

FreeSip: 3.12 in diameter / 10.68 in high. Twist: 2.90 in base / 11.80 in high.
